

 **MENNA**Casting

The **idea** is the starting point.
It's the image of a new
object..., a conception of
its function..., then a
drawing..., a material...,
another one...

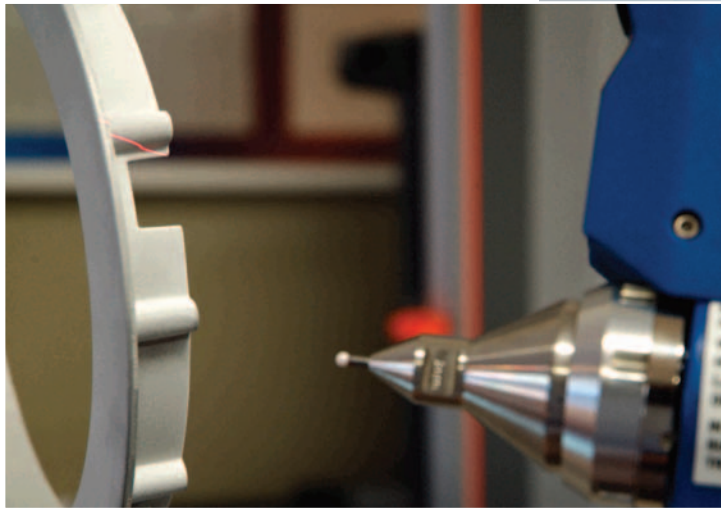

We work in harmony with the
design, we produce the master
we reproduce it.
We are living in the great Era of
Technical Reproducibility

Our **activity** is distributed and embodied in many different expressions of ingenuity. At present the sectors of application are numerous, and growing.

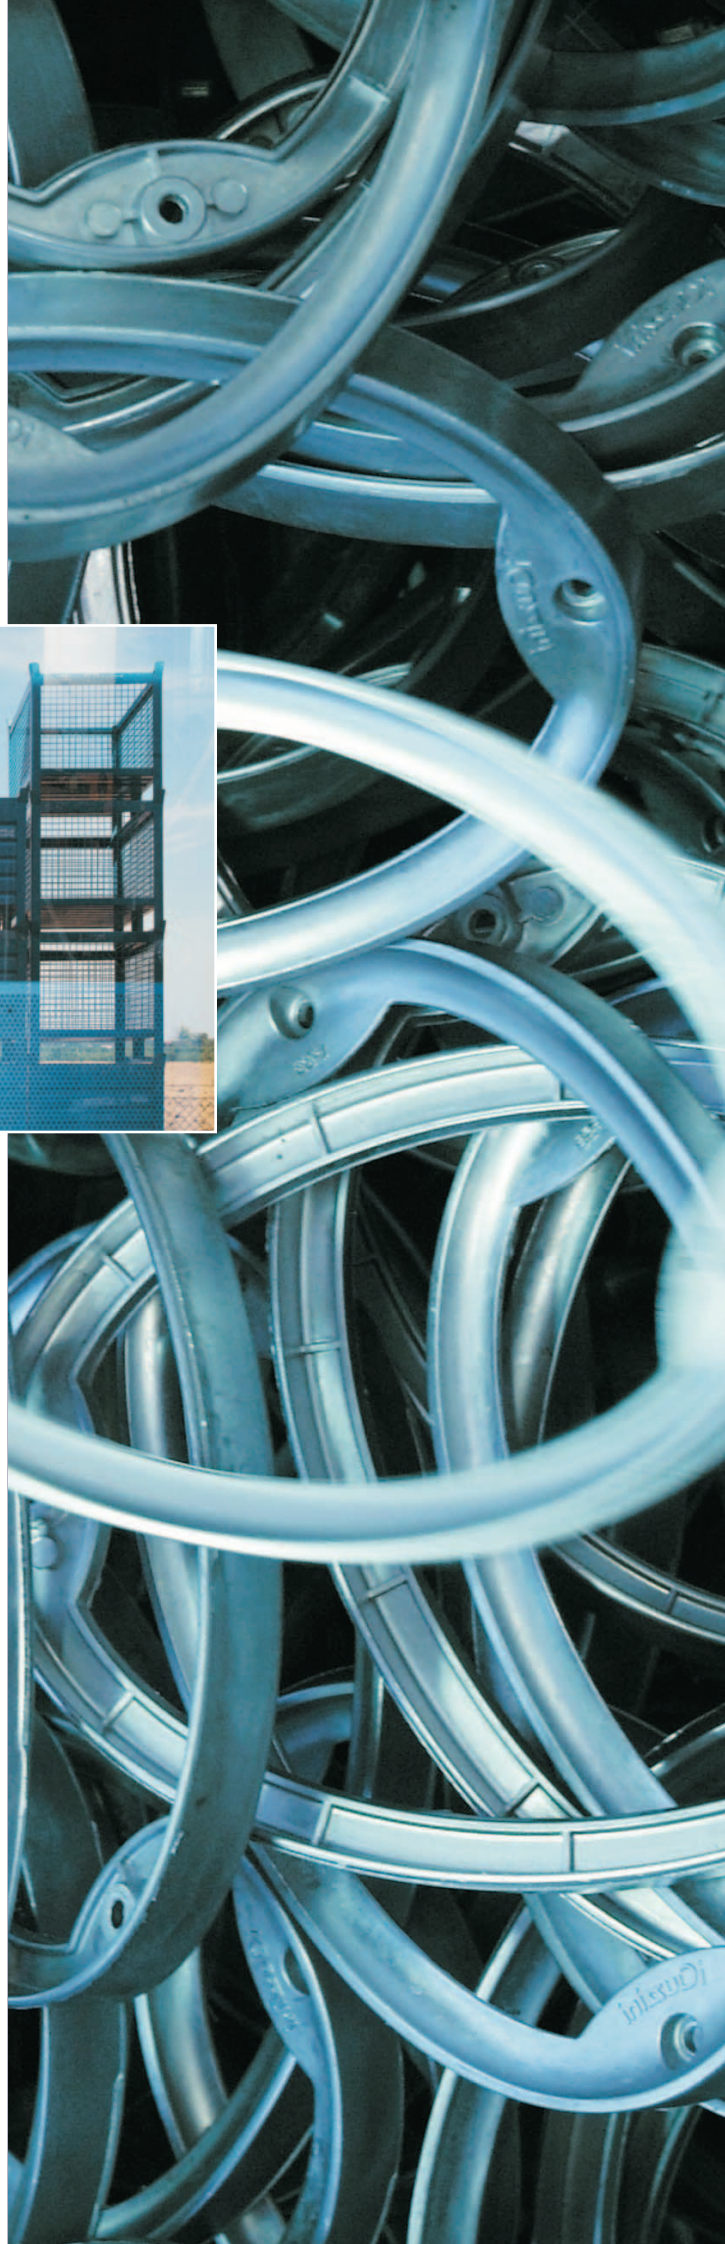

Each piece we create is controlled
and each of our pieces is unique,
constantly abreast of the most
innovative Technologies;
precision is essential to achieve
the quality that is demanded and due.

Each die is preserved like
a **work of art**, like a book, as
testimony to the **teamwork**
that was the hallmark
of its creative process.

We produce dies and die castings
in ALUMINIUM and MAGNESIUM.
We assure a careful **management**,
precise **distribution**
and punctual delivery
